

Getting Started: Create Your Documentation Project

Erik Dahl

PRINCIPAL ARCHITECT

@dahlsailrunner www.knowyourtoolset.com

Demo

Install all prerequisites

Use CLI to create project

Build project

“Hello, world!”

Demo

Create a documentation site:

- Coding with Kids

Use the sphinx-quickstart command

Know before you start:

- Standalone docs or inside a code project?
- Project name and author(s)

Summary

Established local environment

Created doc project

Said “Hello”

Up next: Real content with ReStructured Text
